

Quarterly Index Rebalance

The Sprott Zacks Gold Miners Index is the benchmark for the Sprott Gold Miners ETF (NYSE Arca: SGDM).

The Sprott Zacks Gold Miners Index selects 25 large- to mid-capitalization companies with the highest historical sensitivity to the price of gold and then weights them using 2 factors: 1) Revenue Growth – measured quarterly, on a year-over-year basis; and 2) Long-Term Debt to Equity* – to measure the strength of their balance sheets.

The Index rebalances quarterly and seeks to emphasize gold companies with the highest revenue growth and lowest long-term debt to equity ratio.

Following the November 2017 rebalancing, 2 new companies were added and 2 were removed.

Pretium Resources Inc. and Wheaton Precious Metals Corp. were deleted due to their lower historical sensitivity to gold, while Goldcorp Inc. and Alamos Gold Inc. were added due to their higher historical sensitivity to gold.

About Sprott Asset Management LP

Sprott Asset Management LP (“Sprott”) is an alternative investment manager that specializes in precious metals and natural resource investing. Headquartered in Toronto, Canada, the mining finance center of the world, Sprott manages several billion dollars in precious metals investments, including the Sprott Physical Bullion Trusts which trade on the NYSE Arca.

IMPORTANT DISCLOSURES & DEFINITIONS

An investor should consider the investment objectives, risks, charges and expenses carefully before investing. To obtain a prospectus, which contain this and other information please contact your financial professional or call 1.855.215.1425. Read the prospectus carefully before investing.

Sprott Gold Miners ETF shares are not individually redeemable. Investors buy and sell shares of the Sprott Gold Miners ETF on a secondary market. Only market makers or “authorized participants” may trade directly with the Fund, typically in blocks of 50,000 shares.

The Fund is not suitable for all investors. There are risks involved with investing in ETFs including the loss of money. The Fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a diversified fund.

The Fund will be concentrated in the gold and silver mining industry. As a result, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the gold and silver mining industry. Also, gold and silver mining companies are highly dependent on the price of gold and silver bullion. These prices may fluctuate substantially over short periods of time so the Fund’s Share price may be more volatile than other types of investments. Funds that emphasize investments in small/mid cap companies will generally experience greater price volatility. Funds investing in foreign and emerging markets will also generally experience greater price volatility. There are risks involved with investing in ETFs including the loss of money. Diversification does not eliminate the risk of experiencing investment losses. ETFs are considered to have continuous liquidity because they allow for an individual to trade throughout the day. The Sprott Gold Miners ETF is a new product with a limited operating history.

ALPS Portfolio Solutions Distributor, Inc. is the Distributor for the Sprott Gold Miners ETF.
