

Sprott Junior Copper Miners ETF (Nasdaq: COPJ) is the only[^] ETF to provide pure-play^{^^} exposure to small, exploration- and development-stage copper miners with the potential for revenue and asset growth. **COPJ** seeks to provide investment results that, before fees and expenses, correspond generally to the total return performance of the Nasdaq Sprott Junior Copper Miners™ Index (NSCOPJ™), which is designed to track the performance of mid-, small- and micro-cap companies in copper mining-related businesses.

[^] Based on Morningstar's universe of Natural Resources Sector Equity ETFs as of 2/28/2023.

^{^^} The term "pure-play" relates directly to the exposure that the Fund has to the total universe of investable, publicly listed securities in the investment strategy.

Key Points

- 1. Pure-Play Junior Copper ETF** – The only pure-play ETF focused on small copper miners, selected for their potential for significant revenue and asset growth
- 2. Essential to Electric Vehicles, Wind and Solar Plants** – Essential to energy transmission, copper is a critical mineral across clean energy generation sources and in electric vehicles
- 3. Growing Demand** – To meet net-zero carbon emissions targets, demand for this critical mineral may increase 58% by 2040, relative to 2022[†]
- 4. Well-Positioned Companies** – Companies that are upstream in the supply chain may be well-positioned to benefit from the increased investment in copper necessary for the clean energy transition

IMPORTANT DISCLOSURES & DEFINITIONS

An investor should consider the investment objectives, risks, charges and expenses carefully before investing. To obtain a Sprott Junior Copper Miners ETF Statutory Prospectus, which contains this and other information, visit <https://sprottets.com/copj/prospectus>, contact your financial professional or call 1.888.622.1813. Read the Prospectus carefully before investing.

The Funds are not suitable for all investors. There are risks involved with investing in ETFs, including the loss of money. The Funds are considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a diversified fund.

Shares are not individually redeemable. Investors buy and sell shares of the Sprott Junior Copper Miners ETF on a secondary market. Only market makers or "authorized participants" may trade directly with the Fund, typically in blocks of 10,000 shares.

Funds that emphasize investments in small/mid-cap companies will generally experience greater price volatility. Diversification does not eliminate the risk of investment losses. ETFs are considered to have continuous liquidity because they allow an individual to trade throughout the day. A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses, affect the Fund's performance.

The Sprott Junior Copper Miners ETF seeks to provide investment results that, before fees and expenses, generally correspond to the total return performance of the Nasdaq Sprott Junior Copper Miners™ Index (NSCOPJ™).
