

**Sprott Junior Uranium Miners ETF (Nasdaq: URNJ)** seeks to provide investment results that, before fees and expenses, correspond generally to the total return performance of the Nasdaq Sprott Junior Uranium Miners™ Index (NSURNJ™),<sup>1</sup> which is designed to track the performance of mid-, small- and micro-cap companies in uranium mining-related businesses. The NSURNJ™ Index is rebalanced semi-annually.

**There were four additions and two removals following the rebalancing of December 18, 2023, and December 22, 2023.**

Western Uranium & Vanadium Corp., ATHA Energy Corp., Baselode Energy Corp. and Anfield Energy Inc. became eligible for inclusion in this rebalance and were added at weights below 1%. Core Nickel Corp. and Premier American Uranium Inc. were deleted from the index as they did not meet size and liquidity constraints. Both of these companies had been included as a result of spin-offs from other uranium miners.

### Index Additions

#### IMPORTANT DISCLOSURES & DEFINITIONS

**An investor should consider the investment objectives, risks, charges and expenses carefully before investing. To obtain a Sprott Junior Uranium Miners ETF Statutory Prospectus, which contains this and other information, visit <https://sprottetfs.com/urnj/prospectus>, contact your financial professional or call 1.888.622.1813. Read the Prospectus carefully before investing.**

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. The Fund is not suitable for all investors. The Fund is non-diversified and can invest a more significant portion of assets in securities of individual issuers than a diversified fund. As a result, changes in a single investment's market value could cause more significant share price fluctuations than in a diversified fund.

**Shares are not individually redeemable. Investors buy and sell shares of the Sprott Junior Uranium Miners ETF on a secondary market. Only market makers or "authorized participants" may trade directly with the Fund, typically in blocks of 10,000 shares.**

Funds that emphasize investments in small/mid-cap companies will generally experience greater price volatility. Diversification does not eliminate the risk of investment losses. ETFs are considered to have continuous liquidity because they allow an individual to trade throughout the day. A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses, affect the Fund's performance.

The Sprott Junior Uranium Miners ETF seeks to provide investment results that, before fees and expenses, generally correspond to the total return performance of the Nasdaq Sprott Junior Uranium Miners™ Index (NSURNJ™).
